

PUBLICATIONS: DETAILS

4.1 Paper Preprint:

- paper version accepted at conference
- not the officially published version
- part of green open access

4.2 Contributing to Software:

- Contributor-License-Agreement (CLA)
 - maintainers free to use, share and modify
 - legally sound
- no CLA
 - simple process, no entry barrier
 - no confirmation by contributor's employer necessary
- Developer Certificate of Origin (DCO)
 - contributor asserts that she is allowed to commit the code
 - clarifies license of the committed code patch

4.3 Making copyright and licenses explicit

Very important!

SPDX is common format to share important data - clarifies how software (patches) are licensed - easy to maintain - automated checks with REUSE

4.4 Artifacts

Reproduction packages.

Examples:

- Data sets, statistics
- software
- machine-readable proofs
- appendices

(Don't forget to license!)

ACM badges qualify reproduction packages:

- Artifact available
- Artifact evaluated (a) function and/or (b) resuable
- Results reproduced (partial)

Repositories:

- Zenodo
- FigShare

Results replicated

Reuse?

- Repeatability
- Reproducibility
- Replicability
- repeat
- reproduce
- replicated

4.5 Publication Process
